INTRODUCTION--Framework

Station overview

Visualize information of the location and the trip frequency of each station

Trip period frequency viz

Visualize the bike trip frequency by day and hours

Station balance viz

Visualize the in and out bike amount imbalance of each station by month

Trip duration viz

Visualize the trip duration time by each customer type

INTRODUCTION--Data

❑ **Station dataset** - StationNum, geographical location and locker numbers.

INTRODUCTION—Our Goal

- ❑ Provide users an effective and meaningful way to obtain Pittsburgh bike sharing system **operation information** and to **plan their bike trips**.
- ❑ Provide an to see the **pattern and trend** of the current Pittsburgh bike sharing system.
- ❑ Help to build a **better bike sharing system**.

VISUAL DESIGN

STATION OVERVIEW

A

Map **station locations** and **station connections** on Pittsburgh neighborhood map. **Mouseover** interaction reduce the map information clutter

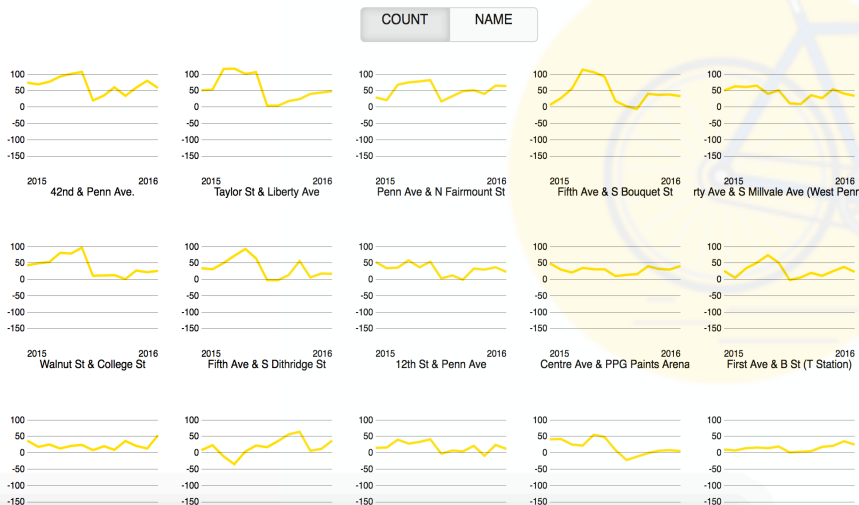

B

Voronoi diagrams to find the largest empty circle, locating **best promising station** location

STATION BALANCE VIZ

Small Multiples for Station Balance

A

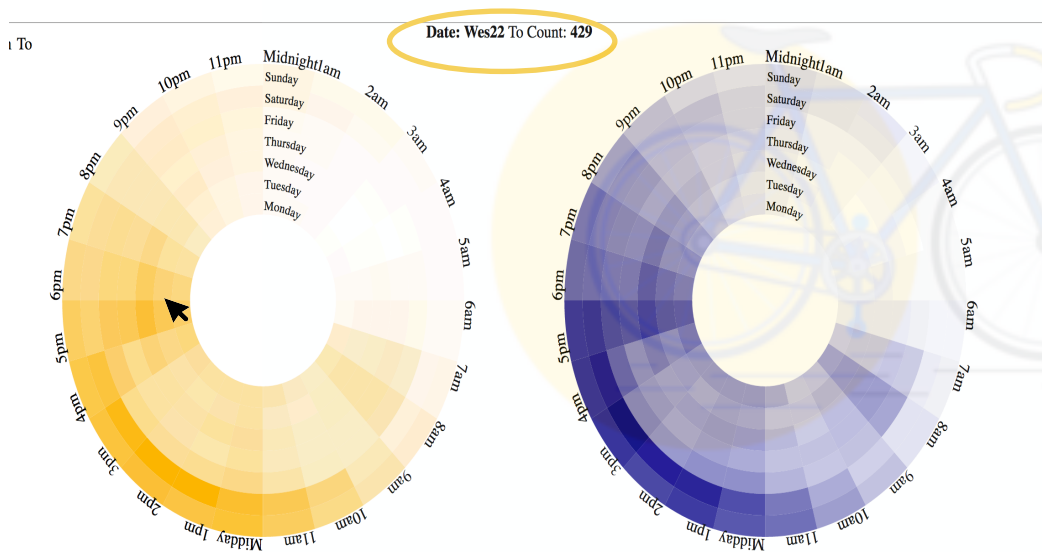

Find out the bike in and out difference at each station. Users can see stations that more tend to start the trip, and make proper adjustment to improve the bike amount distribution

B

The sortable interaction enables review information by amount and station name

TRIP PERIOD FREQUENCY

A

The darker the color is, the higher frequency of the trip in this time period is.

B

Mouse over the single cell can show the specific date time and trip number

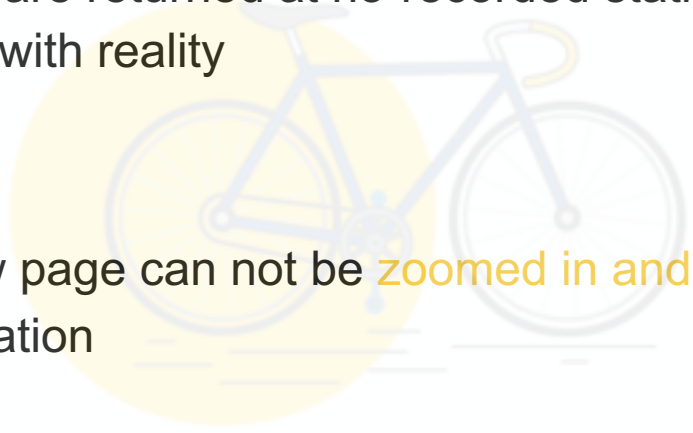

TRIP DURATION

A User can interact with check box to compare/see the **trip duration time** by **customer types** or **duration length**

B Viewers can see **average trip duration** and the trip duration preference between different user types

EVALUATION--LIMITATIONS

- 
- ✎ Since some bikes are returned at no-recorded stations or stolen, the **data set** has slightly difference with reality
 - ✎ The map overview page can not be **zoomed in and out** and the **detail information snippet** of each station
 - ✎ More **in depth information** can be diged out from time dimension

|| Evaluation--Future Improvement

Page design can be more related to topic

More interactive functions for users to dig out more information

Tracking updated data for more accurate trend and pattern visualization

Thanks!
